Land for Life Peace Camp during WorldMUN
26.-30.03.07 Place des Nations, Geneve
„a peaceful lifestyle is within reach“

For many people, cultivating a piece of land is the prime basis to lead a dignified life. The inequitable distribution of land is a main source of conflict in the World. As Human Beings, we are all not only socially responsible, but we do have the possibilities to make this World worth living. With this independent forum we open a dialogue regarding the most pressing issues of global concern and concrete action alternatives in order not to go on bearing the consequences of decisions made by others.
